All good

An autonomous organization, or group governs or controls itself rather than being controlled by anyone else. MUSOM is autonomous institution therefore it should perform accordingly.

In my opinion Mid West University is very good University and I am thankful to join in this University. In my suggestion University should focus on practical education system rather than theoretical. University should internship arrangement for their students. Thank you !

Green environment

Field visit

Extra curriculum activities

Improve internet

As we are the students of MUSOM we are more likely know about our school. In musom we are facilitate with different factors like we got a good wifi, project classes, teacher gives us assignments, presentation, well facilities of water and electricity. As the part of MUSOM we students raise our problem to students welfare council they can directly contact with us to HOD for solving problems. We are become extrovert by participating different programs and sports. Library are well formed. For innovative ideas we got incubation room for group discussion. Some how some difficulty is there more holidays in MUSOM cause by MU.

MUSOM can defined as a proper and well managed teaching and learning activities relationship between senior and junior is on top level including cooperative professor and excellence staffs "MUSOM is not only a organization it's a box of happiness fulfilled with much blessing"

Every teacher should be very conscious towards their students and be regular coming in class...Thankyou

The instructional approaches for BBA are inadequate; certain instructors exhibit low attendance, are less engaged, and lack the ability to inspire students towards studying, innovation, and entrepreneurship.
