All good

An autonomous organization, or group governs or controls itself rather than being controlled by anyone else. MUSOM is autonomous institution therefore it should perform accordingly.

In my opinion Mid West University is very good University and I am thankful to join in this University. In my suggestion University should focus on practical education system rather than theoretical. University should internship arrangement for their students. Thank you !

Green environment

Field visit

Extra curriculum activities

Improve internet

As we are the students of MUSOM we are more likely know about our school. In musom we are facilitate with different factors like we got a good wifi, project classes, teacher gives us assignments, presentation, well facilities of water and electricity. As the part of MUSOM we students raise our problem to students welfare council they can directly contact with us to HOD for solving problems. We are become extrovert by participating different programs and sports. Library are well formed. For innovative ideas we got incubation room for group discussion. Some how some difficulty is there more holidays in MUSOM cause by MU.

MUSOM can defined as a proper and well managed teaching and learning activities relationship between senior and junior is on top level including cooperative professor and excellence staffs "MUSOM is not only a organization it's a box of happiness fulfilled with much blessing"

Every teacher should be very conscious towards their students and be regular coming in class...Thankyou

The instructional approaches for BBA are inadequate; certain instructors exhibit low attendance, are less engaged, and lack the ability to inspire students towards studying, innovation, and entrepreneurship.

regularly class in teacher,

1. Bring well qualified faculty
2. Provide regular career counselling activities
3. Provide placement after graduation
4. Invest in corporate social responsibility continuously

Faculty members should be well trained.

- some qualified teacher is required.
- provide the internship opportunity.
- implemented the strict rules and regulations related to study.
- To conduct the effective strategy plan.
- To conduct the effective and valid students council.
- To conduct the workshop, different kinds of practical knowledge.
- To provide the effective subject related professor,
- To determine the management committee within collage.

Here are some suggestions to the MUSOM to improve the school in the days ahead;

1. To Proper utilisation of the resources
2. To Provide more experiences and qualified professor
3. To Provide entrepreneurships program
4. To provide job placement

1. Proper use of resources.
2. If possible then reduce the fees.
3. Please make some space for entertainment such as Sport, canteen, and many more.
4. Ensure that faculty is appropriate for specific subject.

Thank you, obedient student of MUSOM.

Be run in systems and that's fine

Focus more on practical learning and reduce period timing

1. qualified professors of each subject.
2. skill development training should be provided often.
3. collage should provide some favor for bachelor pass-out students, finding job.
4. collage must encourage and motivate students fir startup in business.

I.....

Thank you

Supporting the small business for students

My suggestion is provide the quality education
Make basket ball ground ,
Also music class
International tour

It would be better if college environment were well planted.

I love musom

- 1.Improving organizational culture
- 2.college ground cleanliness should be done after completion of building walls .
- 3.self- monitoring class.
- 4.some projectors doesn't have their remotes and projector HDMI are sometimes useless and didn't work properly.

Treat all students equally

Qualified faculty member
College own canteen
Effective supervision to students at internships.

Teaching skills of maximum faculty members is not good and attractive . They are only focus on the slide rather than practical knowledge and explanation of theories .

Invest in faculty training and development to enhance teaching methods and keep them updated on the latest business practices

Qualified and experienced and specialised teacher should appointed.
MUSOM should focused on building communication skills.
Internal evaluation should be only depends upon student's performance.
Positive factor is during covid pandemic MUSOM was able to provide online classes and exam as well.

Management isn't punctual and organized

to make ECA as a learning class

I don't have any idea

The school have to give more external knowledge. And do more field Visits.

if teacher will be absent plz inform to the student and come regularly in time

Suggestions:

- Bring the very qualified and experienced teachers,
 - Encourage students to study at library,
 - Organize skill development programs,
 - Bring the great people for the speech,
 - Collaboration with different businesses,
 - Choose only good students through entrance examination,
 - Set the organisation goals clearly and take actions to achieve them,
 - Make the learning process easy and fun for students, don't put too much pressure on them,
 - Increase earning sources for organisation don't depend heavily on students fees,
 - Collaboration with different institutions(it might be an international) and run students exchange programs,
- That's all I know

treat all student equally

Every thing is going good and if there is more practical in behaviour in faculty member and school council member it could be better for sustain in future..

1. Not only final exam, also Mid term exam must be tight, I have seen using phones by some students in exam hall.
 2. Absent rate of some teachers is very high. I must be reduced.
 3. We need deep level explanation of any topic. Some teachers explain in short, that we can do by ourselves.
 4. Both teachers and students must arrive in college time i.e. 6:30 am. Some teachers and students arrive at 7 am.
- Students should be well-informed before being absent.

Musom is best

Thanks you
